

Specialist

Complex situations require additional expertise, whilst individual communication preferences demand specific skills. A trained Co-ordinator using a bespoke database will assist in the selection of an appropriate service for your consumer.

Specialist Setting - Specific skills, complex domains

The language of the courtroom or a conference speech adds complexity to a demanding role. We can match the skills of an experienced interpreter to your requirements.

Deaf Relay Interpreters - Bridging communication

If a deaf person uses a foreign sign language, has a disability or a specific language need, an intermediary can be supplied to effect communication.

Lipspeakers - Relaying the spoken word

The primary means of support for deaf people who lipread, a lipspeaker can be provided to repeat clearly what is said and facilitate conversation.

Speech to Text Reporting - Verbatim transcription

When a live transcription is required or, whilst using other communication, support notes are needed, a speech to text reporter can be supplied.

Deafblind Interpreters - Supporting the individual

To assist people who are deafblind, we can provide an interpreter who will use tactile signing & manual fingerspelling to facilitate interaction.
